Trainer Tryout

Over the ^{season} ~~month~~ of winter, I have been testing your latest project, Black 2000, in Ra Park with my friend. I have found a couple of weaknesses for your Leather shoes.

Appearance

I was ecstatic ^{Plain black} to find the colour was right for me. However, it was torn ~~to~~ within a week. In a month, it was ghastly looking! In my netball team practice, my feet were aching all the time. ~~I had~~ There were stones and cuts in them everywhere.

Comfort

When I slipped my toes into these Sneakers, my toes felt fine ... for now. However, a mere 10 minutes later I was thoroughly cross to find that the innersole was dislodged and moving meaning my toes, which were previously happy, felt like they were being rubbed by the base of the shoe. I suggest you look into the comfort.
